

CONTROLCO

2012 DIAMOND DISTRIBUTOR AWARD FOR EXCELLENCE

OAKLAND, CALIFORNIA – October 10, 2011

Controlco received “Diamond Distributor” status for 2012 from Honeywell International based on delivery of excellent business results and behaviors. Gary Smith, Regional Honeywell Sales Leader said, “It is quite an achievement to reach the Honeywell Diamond status three years in a row, and to be the only designated firm in California.”

Terry Turner, Controlco President said, “We are very pleased to have again received this award. Our dedicated employees all across the company deserve all the credit. They go the extra mile to provide great customer service. Also, our employees and Premier Automation Contractors (CPAC) regularly participate in intensive product training to stay on top of new technologies for installation and implementation. We are all proud of this award.”

Automation controls and management-level programming are critical to energy efficiency and sustainability. The 2011 Green Building Code has requirements for sustainability, energy conservation, and automatic control systems. In addition, the U.S. Green Building Council’s Leadership in Energy and Environmental Design (LEED) Building Rating System™ has set energy performance requirements for project rankings.

Controlco is a premier distributor of automation systems. Since 1958, Controlco has provided controls, instrumentation, and programmable management systems for commercial and industrial applications. We have more than 80 employees and continue to grow. Our traditional distribution operations, the software division (CSI³) and the Sustainable Solutions Group (CSSG) are expanding and serving clients throughout the world from offices in California (Fresno, San Diego, Irvine, Bakersfield, Modesto, Sacramento, Oakland, and San Francisco), Nevada, and Arizona.
